SKILLS   EXPERTISE

- REST API Integration .
- Component-Based UI Development
- Interactive & Dynamic Interfaces
  AI-Powered Feature UI/development
- Frontend Technologies
- Diploma Engineering

TECH STACKS   TOOLS

Html | Css | JavaScript

VueJS | NuxtJS | ReactJs

Git | Github | NodeJs

Firebase | TailwindCSS

Canva | Figma

CAREER OBJECTIVE   OVERVIEW

To craft visually engaging and high-performing web applications that blend clean, maintainable code with intuitive user experiences.
Driven by a passion for front-end innovation and continuous learning, I aim to contribute to impactful global projects that push creativity and performance forward.

PROJECTS

Online.com   LIVE

"Designed a modern, responsive landing page for Online.com, enhancing performance, ensuring seamless user experience across devices, and integrating smart search for improved product discovery."

Delicious Salads menu   LIVE

"Enhanced user experience in online ordering. Integrated backend APIs for seamless data flow. Built tools to streamline menu management and order workflows. Developed features like: real-time order status tracker & dynamic menu listing."

AI-trip-planner   LIVE

Developed a responsive and dynamic UI for an AI-powered Trip Planner using Tailwind CSS, Vue.js, and Nuxt.js. Integrated APIs to generate personalized travel plans through AI, including automated destination suggestions, budget estimation, and itinerary generation for a seamless user experience.

Ai-powered-idea-generator   LIVE

Built an AI-powered Idea Generator using Vue.js, Nuxt.js, and Tailwind CSS that transforms user prompts into complete project ideas. The system automatically generates project concepts, feature lists, tech stacks, and development roadmaps based on user input, providing an intelligent and interactive experience.

Education & Experience

Diploma Engineer & Front-End Developer

Bogura, Dhaka, Bangladesh   2022 - 2025

Completed SSC in Science, then studied at Bangladesh Government Polytechnic Institute (2019–2024) with a CGPA of 3.87/4.00. Skilled in HTML, CSS, JavaScript, Tailwind, Vue.js, Nuxt.js, React.js, and Firebase. Focused on creating modern, responsive web apps with clean UI/UX. Currently developing eCommerce and AI-based projects while continuously growing in the tech field.
